Standard Types of Door Stickings and Panels

Specifications

Doors

THICKNESSES

The standard thicknesses for doors are 1⅜″ and 1¾″ but doors can be made ¾″, 1⅛″ and 2¼″ if so ordered.

A "thickness tolerance" not exceeding 1/16″ less than above thicknesses shall be allowed for all doors.

WIDE RAILS OR PANELS

Rails or Panels wider than 9¾″ may be either solid or glued up, in solid doors.

CONSTRUCTION

All assembled with dowels extending into stiles and rails approximately one-half the width of stiles.

All solid stuck and machine sanded.

VENEERED INTERIOR DOORS OF STILE AND RAIL TYPE

These shall be constructed of thoroughly seasoned materials redried by door manufacturer before assembly to a proper and uniform moisture content suitable for the climate in which the doors are to be used. All core materials shall be of a soft Pine glued up of blocks not over 2 inches wide on the face, and joints in adjacent rows of core well staggered. Unless otherwise stated, exposed edges shall have a ¾ inch thick strip of the same wood as the face veneer.

Veneers for stiles and rails shall be ⅛ inch before sanding unless otherwise noted. All glue used in the door construction must be high grade vegetable or water resistant casein glue, equally distributed over the surface and applied under pressure before "chilling." Panels shall be three or five ply as noted. Joints shall be assembled with hardwood dowels not less than ½″x5″, joints 6″ or less to have two dowels with an additional dowel for each additional 3 inches or fraction in width. All joints must be well fitted and all moulded edges smoothly machined. Unless otherwise noted, all doors shall be smoothly machine sanded with "00" sand-paper.

VENEERED INTERIOR DOORS OF FLUSH TYPE

These shall have cores constructed of vertical blocks not over 2 inches wide on the face, well glued together with joints well staggered and surrounded with ¾ inch edge-strip on all four edges of the same wood as the face veneer; or in lieu thereof the side edges are to have ¾ inch edges and the top and bottom edges are to have two coats of paint or varnish before leaving factory. All cores shall be soft Pine properly dried and seasoned as described above. Assembled core shall be brought to uniform surface to which shall be applied a horizontal cross banding extending to edges of door and a 1/16 inch before sanding (or a ⅛ inch before sanding if preferred by architect) vertical face veneer. All glue shall be high grade vegetable or water resistant casein product equally distributed and applied under pressure before "chilling". Unless otherwise noted all flush doors shall be smoothly machine sanded with "00" sand-paper. In lieu of all vertical blocks, the core shall be of stile, rail and panel units. Each unit made up entirely of blocks, all of which when assembled with dowels will make a solid core foundation for cross banding and veneer.

VENEERED EXTERIOR DOORS

These shall be made to the same specifications, except that veneers for stiles and rails and flush doors shall not be less than ¼″ before sanding and shall be applied with a high grade casein water resistant glue.

WINDOWS AND SASH

Standard thicknesses of sash are 1⅛″, 1⅜″ and 1¾″ but can also be made up ¾″, 2¼″ and 2½″.

A "thickness tolerance" not exceeding 1/16 inch less than above thicknesses shall be allowed for all windows and sash.

MACHINING AND ASSEMBLY

If not otherwise specified, window and sash construction, at manufacturer's option, may be "mortised and tenoned" or "slot mortised."

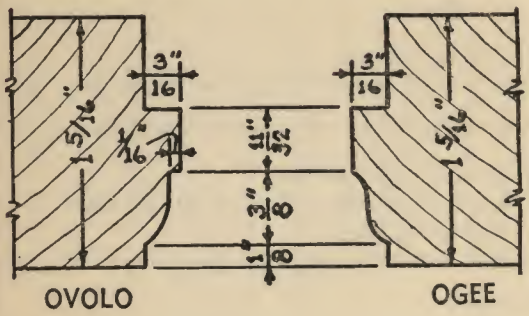
Standards for Check Rail Windows



There are some variations in the dimensions and construction of sash as produced by different manufacturers. Where exactitude as to sticking and construction are desirable, specify the standards as established by the National Door Manufacturers Association, Inc.

These standard check rail windows are identified by the NDMA numbers shown in the accompanying details. Windows specified by these numbers conform exactly to the sticking contours and dimensions shown, and all joints are made in exact conformity to standard details to assure high quality of construction.

(★) **Note:** Unless otherwise specifically stated, the standard opening sizes shown in the following lists are Western openings.

(*) **Note:** There are exceptions to the above layout on 4 and 8 light Baltimore and Washington sizes. On Four and Eight Light Windows 13″ and 14½″ wide, allow 5½″ for wood. On Four Light Windows 14″ wide, allow 5″ where opening is 2′9″ and 6½″ where opening is 2′10½″. 13¼″, 13½″ and 15″ are not regular stock sizes. Where these layouts are ordered, a definite understanding as to width of stiles and muntins should be reached.

Note: Sizes of stiles and rails in all Markets may vary slightly with the different manufacturers but the finished opening or overall size of window is essentially the same in all cases.

Grading Rules

PINE DOORS (EXCEPT GARAGE DOORS)

No. 1 QUALITY: Material in No. 1 doors shall be practically free from defects. White sap, light brown water stain and light red kiln burn not considered defects. Also one (1) carefully repaired pitch seam not over 2½ inches in length permissible in each stile or bottom rail.

Workmanship must be good.

LAMINATED PANEL DOORS: Panels shall have two good faces practically free from defects and may contain not to exceed 25% pieced faces. Inconspicuous patches shall be admitted.

No. 2 QUALITY: Material in No. 2 doors may contain light blue stain, medium brown water stain or medium red kiln burn showing on not to exceed 50% of the area of any piece. Also pitch streaks, checks, pitch pockets, if carefully slivered, tight sound knots not to exceed ⅝ inch in diameter, and other defects, not one of which shall be more serious in nature than the defects already enumerated. Each stile must contain one (1) such defect, but no piece shall contain more than two (2), and no door shall contain more than eight (8) such defects on each side.

Plugs admitted but regarded as defects.

Slight defects in workmanship admitted.

LAMINATED PANEL DOORS: Panels may contain slight stains and discolorations. Any amount of unmatched pieced faces permissible. Inconspicuous patches shall be admitted.

No. 3 QUALITY: Material for No. 3 doors may contain all blue stain, brown water stain or red kiln burn, also worm holes, checks, pitch streaks, pitch pockets, fine shake, tight sound knots not to exceed 1½ inches in diameter and other defects, not one of which shall be more serious in nature than defects already enumerated. Each stile must contain two (2) such defects, but no piece shall contain more than four (4) and no door shall contain more than twenty (20) such defects on each side.

Plugs admitted but regarded as defects.

Slight defects in workmanship admitted.

LAMINATED PANEL DOORS: Panels may contain medium to heavy stains and discolorations, also pin knots and other equivalent defects. Any amount of unmatched pieced faces and any number of patches permissible.

PINE GARAGE DOORS

Pine Garage Doors shall be graded according to Pine Door rules as shown above except mill-run grade which may contain blue stain, brown water stain or red kiln burn, checks, pitch streaks, pitch pockets, fine shake, tight sound knots not to exceed 2 inches in diameter and other defects none of which shall be more serious in nature than defects already enumerated.

PINE SASH AND WINDOWS

Material in No. 1 Sash and Windows shall be practically free from defects. White sap, light brown water stain and light red kiln burn not considered defects.

Workmanship must be good.

Directions for Ordering

Time, annoyance and expense can be saved by noting and following closely the suggestions below:

SASH AND WINDOWS

All orders and inquiries will be considered to be for regular Western style and sizes as described in this catalog, unless specifically ordered otherwise.

Always give width first, length or height second, then thickness.

Always use inches to designate glass size, and feet and inches for openings or outside measurements.

The term "Sash" indicates only one piece to fill opening. The term "Window" indicates two pieces (upper and lower sash).

State size of glass, number of lights, opening, and thickness.

If a window, whether check or plain rail.

Where a window or sash is ordered with top and bottom lights of different heights (example, 2 light 40x30x38), it is understood that the first measurement (40) is the width of both lights, that the second measurement (30) is the height of the top light, and that the third measurement (38) is the height of the bottom light.

If segment or circle head, give number of style desired (see page 77) and radius of circle or segment if not regular. When Circle Head not otherwise specified, we will furnish Style No. 2 with a radius one-half the width of the sash, less the width of the stile, and for segment Head Style No. 4 with a radius the width of the sash, less the width of the stile.

When an odd sash or window is ordered, always give both glass size and number of lights and outside opening, and if possible send sketch.

If specific sizes of stiles, rails or bars are desired, they must be specified.

NOTE: All windows and sash are understood to be glazed unless specifically ordered open.

DOORS

State width, height and thickness, number of panels and arrangement of same and quality.

State style of sticking desired. (See Page 2).

If moulded, state whether flush or raised mould one or two sides.

If odd, send sketch or detail.

Odd doors will be made with regular stock widths of stiles, rails, muntins and panels, unless specifically ordered otherwise.

Trade Terminology

The definitions below give the meaning of various terms used in this book or in quotations affecting articles described as established by general usage.

In General

MEASUREMENTS

Outside Opening—The measurement of any given article from outside to outside. The frame opening always should be given in feet and inches.

Wood Allowance—The difference between the outside opening and the total glass measurement of a given window or sash.

Between Glass—The measurement across the face of any wood part which separates two sheets of glass.

Face Measure—The measurement across the face of any wood part exclusive of any solid mould or rabbet.

Finished Size—The measurement of any wood part overall, including the solid mould or rabbet.

Ripping Size—The width of stock necessary to produce any given finished size. Usually ¼ inch over finished size.

MOULDING

Solid Mould or Solid Stuck—A mould which is worked on the article itself.

Applied Mould—A separate mould to be applied or attached.

Flush Mould—An applied moulding which finishes flush with, or below the face or surface of the stiles or rails.

Raised Mould—An applied moulding which partly covers or which extends above the face or surface of the stiles or rails.

MULLION

An upright or vertical bar, usually wider than the ordinary bar, dividing the glass in a sash, or a wide upright bar dividing two sash in a frame. Applies also to upright bars in doors.

MUNTIN

Applies to any short or light bars—either vertical or horizontal—in a sash or door between glass or panels and not extending the full width or length of the article.

RAIL

The cross or horizontal pieces of the frame-work of a sash, door or screen.

STILES

The upright or vertical outside pieces of a sash, door or screen.

Applying to Sash or Windows

SASH

A sash indicates a single piece to fill a given opening.

WINDOW

A window indicates two pieces—one upper, one lower—to fill an opening, arranged to slide vertically.

FRONT WINDOW—A window in which the meeting rails are placed above the center of the opening.

FRONT SASH—A sash made to correspond to a front window.

FULL BOUND

This term indicates that the sash so described shall have a similar amount of wood in stiles and top and bottom rails, usually described as "same rail all around."

MEETING RAILS

The rails of a window which meet when the window is hung and closed.

PLAIN RAILS—Meeting rails of the same thickness as balance of the window

CHECK RAILS—Meeting rails sufficiently thicker than the window to fill the opening between the top and bottom sash made by the check strip or parting strip in the frame.

LUGS OR HORNS

An extension of the stiles of a window beyond the meeting rails.

SUSPENDED LIGHTS

A term applied to a light within a sash, formed by straight bars, any one of which must be attached to the free end or to the beveled joint of other bars or muntins.

Applying to Doors

ASTRAGAL

MOULD—FOR FOLDING DOORS—A strip of moulding the length of the door of any desired pattern to be applied to one of a pair of folding doors so as to form a rabbet.

SINGLE—FOR FOLDING DOORS—A strip the length of the doors with a cross-section, usually similar to a letter "T"—used to form a rabbet.

DOUBLE—FOR SLIDING DOORS—A pair of strips the length of the doors—rabbeted to receive the doors on the back and moulded or grooved reciprocally on the face to make a closed joint.

JOINT—FOR SLIDING DOORS—A moulding or groove worked reciprocally on the meeting edges of each of a pair of doors to make a closed joint.

BANDED DOORS

Doors with a thin band or strip—usually moulded—applied to the outside edge of the face of each stile and top and bottom rail—also called friction strips.

CHAMFERED DOORS

Doors with the corner of the stiles or rails beveled at an angle of about 45 degrees. STOP CHAMFER—A chamfer stopped or ended short of the length of the piece chamfered.

DOWELED DOORS

Doors put together with dowels instead of tenons.

DUTCH DOORS

A door cut horizontally through the lock rail, so that the upper part may be opened independently of the lower part.

GRADUATED PANELS

Doors with cross panels of a different width usually graduated from a wide lower panel to a narrow top panel.

LOCK RAIL

The wide center rail of a door.

TENONS

THROUGH TENONED—A door made with tenons on the end of the rails mortised or tenoned through and showing on the outside of the stile.

BLIND TENONED OR MORTISED—A door made with the tenons on the ends of the rails mortised into but extending only part way through the stile.

UNSELECTED

The term "Unselected" when applied to veneered doors means unselected as to color and admits all of the natural variations of the wood.

CASEMENT SASH EXTRAS

(A) For pairs, double the list of a single Casement Sash of the size necessary to make a pair, and if rabbeted, add extra shown below.

(B) For meeting stiles rabbeted plain or rabbeted and beaded, add per pair, if open, list $0.35
If glazed, list ..... .45
This includes extra for wide meeting stiles to permit rabbeting.

(C) For Casement Sash made with wide meeting stiles to permit of rabbeting, but not rabbeted, add for the meeting stiles, to the sash open, one cent per lineal foot for each ¼" wider of meeting stiles, that is, figure twice the length of a single stile.

If sash is glazed, add $0.01¼ per lineal foot list for each ¼" wider of meeting stiles, that is, figure twice the length of a single stile.

If beads are wanted, add as per Rule 11, page 56.

Sash Extras

These List Extras apply to the open and glazed lists and cover the listing of items not otherwise provided for, with standard sticking. Add extra for any type of sticking requiring special knives.

For smaller than listed and intermediate sizes, use same list as next larger listed size.

Rule 1 Windows Larger Than Listed Sizes

	Open List 1⅜″ Thick
(A)—1⅜″ open windows wider than listed sizes, use list of widest listed size of a similar window of same height, and add for each additional two inches or fraction thereof in width.....	$0.15 List
(B)—1⅜″ open windows higher than listed sizes, use list of highest listed size of a similar window of same width, and add for each additional four inches or fraction thereof in height.....	.15 List

(C)—For 1¾″ and thicker add extra per Rule 6.

(D)—Glazed windows figure open as above and add for glass and glazing.

Rule 2 Single Sash Not Listed

(A)—To make single sash list of any 1⅜″ 1 light open sash with standard layout (not over 2⅜16″ Stiles and Top Rail, not over 3⅜16″ Bottom Rail overall) and not listed or otherwise provided for, figure the distance around the opening, (outside measure) at per lineal inch.....	.01 List
At the above basis, no sash to be figured at less than.....	.75 List

(B)—For wood parts larger than a standard layout see Rule 3.

(C)—For divided lights in above sash, add for such lights as per Rule 10.

(D)—For 1¾″ and thicker add extra per Rule 6.

(E)—Glazed sash figure open as above and add for glass and glazing.

Rule 3 Wide Stiles, Rails or Bars

	Open 1⅜″ Thick	Glazed 1⅜″ Thick
(A)—All list prices are based on standard layout shown. Stiles, top and bottom rail wider than standard layout, 1⅜″ thick, add for each additional ¼″ or fraction thereof of parts affected, per lineal foot..	$0.01 List	$0.01¼ List
Note: Footage to be figured for full opening height and/or width, and if a fractional width or height, use the next full foot, see example Section "F".		
(B)—Check rails, higher than 1⅝16″ and not higher than 1⅝″ for 1⅜″ windows, add per lineal foot for each check rail.....	.02 List	.02½ List
(C)—Check rails, not higher than 1¹¹⁄16″, permitted for 1¾″ windows.		
(D)—Check rails, 2 or 2¼″ high for 1¾″ windows, add per lineal foot for each check rail.....	.06 List	.07½ List
(E)—Bars and muntins, wider than standard layouts, 1⅜″ thick, add for each additional ¼″ or part thereof, for each bar or muntin, per lineal foot....	.01 List	.01¼ List

(F)—(Method of application for Rules A to E inclusive). Footage in all cases of fractional widths and/or heights to be figured at the next full foot.

(Example) 10x12-12 light 1⅜″ check rail open with 2½″ stiles and top rail, 1⅝″ high check rail, 3¾″ bottom rail, 1″ bars, over all measurements.

Sash Extras—*Continued*

Panel and Sash Door Extras

These extras are intended to enable the forming of a complete list on all designs and sizes not regularly listed.
For intermediate sizes, use list of the next larger listed size.

Rule 1 Larger or Smaller Than Listed Sizes

(A)—Doors narrower than listed sizes, use list of narrowest door of same height, and deduct therefrom for each full 2″ narrower.... **10c List**

(B)—Wider than listed sizes, use widest list shown for same height, and add for each additional 2″ or fraction thereof..... **5%**

(C)—Higher than listed sizes, use list of highest listed size of same width, and add for each additional 4″ or fraction thereof..... **5%**

NOTE—Apply width and height percentages separately, by basing second computation on the list plus first computation

EXAMPLE—You want a list on a 5X panel door, 3-6x8-6 1⅜″. Take the list of a 3-4x-8-0 1⅜″ of $11.30 and add 5% for extra width or 57c, equals $11.87. Then add 10% for extra height, or $1.19, making a total list of $13.06.

(D)—Single doors made to represent pairs, use twice the list of a door one-half the width, (and if larger than listed size, add as per sections B and C of this rule) and then add..... **$3.50 List**

Rule 2 Sash Doors (With Altered Glass Height or Divided Panels)

(A)—For shortening or lengthening glass in doors that are listed, thus increasing or decreasing the height of panels, add or deduct for each one inch or fraction thereof..... **3c List**

	1⅜″	1¾″
(B)—Full length panels when cut up into small panels, add to the list of a door of similar layout with full length panels, for each additional muntin or cross rail not over 3½″ wide overall and not over 1-0 long....	10c List	12½c List
Over 1-0 in length add to the above for each additional 6″ longer, per each additional muntin or cross rail.....	2½c List	4c List

Wider than 3½″, add as per Rule 5, Section B or C.

Rule 3 Sash Doors Not Illustrated

(A)—To make list for open sash doors, with panels and one light, not otherwise listed or provided for.
Use the list of N. D. 620 or 635 depending on layout desired, of the size wanted, and deduct for glass beads, and proceed as follows:

Cross Rails and Mullions

(B)—For each cross rail and mullion 2′5″ and under in length, not over 4¾″ wide overall, add.....	35c List	50c List
Longer than 2′5″ and not longer than 2′11″, add.....	47c List	65c List
Longer than 2′11″ and not longer than 3′5″, add.....	55c List	80c List
Longer than 3′5″ and not longer than 3′11″, add.....	71c List	95c List
Longer than 3′11″, for each 6″ longer or fraction thereof, add to the 3′11″ list.....	20c List	30c List
For beads, add per lineal foot around glass opening.....	3½c List	3½c List

For wider stiles, cross rails, mullions or bottom rail, use Rule 5, Sections A, B and C.

Panels, Solid Raised or Solid Flat Not Over 9/16" Thick, Laminated Flat Panels Not Over 5/16" Thick.

(C)—For each panel 2'5" and under in length, not over 8½" wide, add	35c List
Longer than 2'5" and not longer than 2'11" not over 8½" wide, add	47c List
Longer than 2'11" and not longer than 3'5" not over 8½" wide, add	51c List
Longer than 3'5" and not longer than 3'11" not over 8½" wide, add	71c List
Longer than 3'11" and not over 8½" wide, for each 6" longer or fraction thereof, add to the 3'11" list	16c List
For each panel 2'5" and under in length over 8½" wide, and up to and including 11¾" wide, add	45c List
Longer than 2'5" and not longer than 2'11" and not over 11¾" wide, add	62c List
Longer than 2'11" and not longer than 3'5", and not over 11¾" wide, add	65c List
Longer than 3'5" and not longer than 3'11", and not over 11¾" wide, add	96c List
Longer than 3'11", and not over 11¾" wide, for each 6" or fraction thereof, add to the 3'11" list	20c List
For solid softwood panels wider than 11¾", use Rule 5 Section D	
For solid softwood panels, thicker than 9/16", use Rule 8, Section B.	
For Laminated Raised Panels or Flat Panels thicker than 5/16", see Rule 8, Sections E-F-G.	

Rule 4 Thick Doors

(A)—Doors thicker than 1¾", up to and including 2¼" (single or double thick), not splined, screwed or plugged, add to the list of 1¾" thick door of same size	75%
(B)—Doors thicker than 2¼", up to and including 2¾" (single or double thick), not splined, screwed or plugged, add to the list of a 1¾" thick door of same size	110%
(C)—If double thick doors are splined, 2 splines to a stile, add in addition to Sections A or B of this rule	$ 2.25 List
If double thick doors are screwed and plugged, add in addition to Sections A or B of this rule	12.50 List
(D)—Panels not over 1⅛" thick permitted in 2¼" and 2½" doors. For thicker panels, see Rule 8.	

Rule 5 Wide Stiles, Rails, Munts and Panels

	1⅜"	1¾"
(A)—For stiles including top rail, wider than layouts shown, add for each additional ¼" wider or fraction thereof	16c List	25c List
(B)—Top, cross, lock or bottom rails, wider than layouts shown, add for each additional ¼" wider or fraction thereof	4c List	6c List
(C)—For mullions wider than layouts shown, add for each additional ¼" wider or fraction thereof. For lengths not over 1'11"	2c List	2½c List
For lengths over 1'11" to 3'11"	5½c List	8c List
For lengths over 3'11" to 5'11"	8c List	12c List
(D)—Solid softwood panels (not otherwise specified) wider than 11¾", add extra for each one inch or fraction thereof wider	7½c List	7½c List

Panel and Sash Door Extras—*Continued*

Rule 6 Standard Arrangement of Raised Panel Doors

(A)—4 regular and 5 regular panel doors when over 3′0″ and not wider than 4′2″ will be made 3 upright panels wide.
Over 4′2″ and not wider than 5′6″ will be made 4 upright panels wide.
Over 5′6″ and not wider than 6′8″ will be made 5 upright panels wide.
Over 6′8″ and not wider than 8′0″ will be made 6 upright panels wide.

(B)—Cross panel doors, up to and including 7′2″ high, will be made 5 panels high.
Over 7′2″ and not higher than 8′6″, will be made 6 panels high.
Over 8′6″ and not higher than 9′10″ will be made 7 panels high.

(C)—For a less number of panels than shown above, (making wider panels necessary) add extra per Rule 5, Section D.

(D)—For a greater number of panels than provided, for 4 regular, 5 regular and 5 cross panel doors, add for each additional panel... **45c List**
This includes only the 3 designs of doors mentioned above.

(E)—For other types of doors containing 6 or 8 or more panels, use lists and extras on pages 63 and 64.

Rule 7 Divided Lights

(Bars not over ½″ between glass)

In doors not listed or otherwise provided for, and special designs, deduct for beads omitted in one light door and add as follows: (If beads 2/S, see Rule 31, page 125).

	1⅜″	1¾″
(A)—Rectangular lights (not marginal) including beads for glass, add as follows:		
Up to and including lights 16″ high, add per light	30c List	35c List
Over 16″, up to and including 30″ high, add per light	35c List	40c List
Over 30″, up to and including 50″ high, add per light	45c List	50c List
Over 50″, add per light	75c List	85c List
NOTE—For rectangular lights formed by horizontal bars only, apply section A of this rule reading width for height.		
(B)—Marginal lights, add to the rectangular light basis, per light	2c List	2½c List
(C)—Diamond, triangular or irregular shaped lights, if formed by straight bars, add per light	90c List	$1.00 List
(D)—Diamond lights, entirely suspended by bars, add per light	$5.00 List	5.20 List
And for surrounding lights, add per the rectangular light basis per Section A of this rule.		
(E)—Circular or oval lights, entirely suspended by bars, add per light	6.60 List	7.05 List
And for surrounding lights, add per the rectangular light basis, per Section A of this rule.		
(F)—Serpentine lights, add per full length bar, for each bar	6.00 List	6.45 List
And for the other lights, add per light, per Section C of this rule.

75	3.15	4.95	6.00	10.05

(B-2)—For each 2″ or fraction thereof in width over 28″, add to the 28″ width for same height 10%

(B-3)—For each 6″ or fraction thereof in height over 75″, add to the 75″ height of same width 10%

(C)—For panels 2″ or 2¼″ thick in 2¼″ or 2½″ thick doors, add to the list of desired door with standard thickness panels per square foot of panel surface ..... $1.40 List

For panels 2½″ thick in 2½″ thick doors, add to the list of desired door with standard thickness panels per square foot of panel surface ..... 1.80 List

(D)—For irregular shaped thick panels, not otherwise provided for, add to the list of a regular panel of similar size and thickness.... 10.00 List

(E)—For 3 ply laminated raised panels regardless of thickness, add in addition to the above thick panel extras where required, per door 1.50 List

(F)—For 3 ply laminated flat panels over 5/16″ thick add for each ¼″ or fraction in thickness, per door ..... .75 List

(G)—For 5 ply laminated panels double the three ply extras.

Rule 9 Special Raised Panels

When panels are of a different raise on the two sides of a door, or if raise is wider than 2″ and not over 3″, or when both features occur in the same door, add per panel:

1 Panel ..... $0.55 List
2 or 3 Panels ..... .40 List
For more than 3 Panels ..... .25 List

Rule 10 Irregular Shaped Panels

(A)—For rectangular suspended panels, solid stuck and flat panels, (per sketch "X") add to the list of a door with an equal number of panels ..... $18.00 List

(B)—For diamond shaped suspended panels, solid stuck and flat panels, (per sketch "Y") add to the list of a door with an equal number of panels ..... 24.00 List

(C)—For oval or circle shaped suspended panels, solid stuck and flat panels, (per sketch "Z") add to the list of a door with an equal number of panels ..... 24.00 List

NOTE—The extras on designs X, Y and Z apply where the irregular shaped Panel covers practically the full length of the door within the frame, like the sketches. Where such panels are inserted in either the top or the bottom section of a door divided into a greater number of panels; deduct 35% from the three foregoing extras.

Woodwork Requires Proper Care

Wood has a natural affinity for water because of the nature of its structural fibers and continuously absorbs or gives off moisture in proportion to the changes in the humidity of the surrounding atmosphere.

Either excessive moisture or excessive dryness of the atmosphere can seriously damage woodwork. There is a common tendency to dry out the interior of a house during the heating season by failure to supply the air with sufficient moisture. The relative humidity—the amount of moisture contained in air expressed in percent of the maximum which the air can hold at a given temperature—should be maintained at a minimum of 50 degrees in summer and 35 degrees in winter.

In highly insulated houses with weatherstripped windows and doors and with moisture provided through the heating plant, humidity may build up to an excessive degree. In such a condition, reduction of moisture in the heating plant or ventilation is required.

Woodwork should not be delivered to a building until it has had time to dry out to a safe relative humidity. It should not be stored in a basement nor delivered during wet weather without adequate protection.

All woodwork should receive at least a priming coat upon delivery. The backs as well as the faces of all trim and casework and the edges of doors and sash, after fitting, should always be protected by paint or varnish.

It should be noted, however, that no paint is a perfect protection against some eventual absorption of moisture.

General Veneered Door Extras

The following EXTRAS apply to Panel Doors, Sash Doors and Side Lights and are to be added to the Base List and Typical Design Extras as shown on the preceding pages.

Rule 1 — Doors Oversize

Use base list extras as shown on Panel and Casement door lists (pages 196 and 197) Plus the following extras for doors over 4′0″ wide and 8′0″ high:

(A)—Over 4′0″ wide but not over 5′0″, add to the 4′0″ basis	$6.00
Over 5′0″ wide but not over 6′0″, add to the 5′0″ basis	6.00
(B)—Over 8′0″ high but not over 10′0″, add to the 8′0″ basis	10.00
Over 10′0″ high but not over 12′0″, add to the 10′0″ basis	10.00
Over 12′0″ high but not over 16′0″, add to the 12′0″ basis	10.00
NOTE—In addition to the above, for all doors over 8′0″ in height, add for all extras, per foot or fraction thereof	5%

Rule 2 — Doors Over 1¾″ Thick

For each ¼″ or fraction thereof, add to the 1¾″ Veneered Door Basis, per door:

African Mahogany, American Walnut and Mexican Mahogany	$1.20
Philippine Hardwood, Q. S. White Oak and Plain White Oak	.80
Other Native Woods	.70
On Insert Frame Doors (Panels standard thickness), add to the foregoing	50%

Rule 3 — Two Kinds of Wood

Figure the average of both woods; add the design extra for the more expensive wood and then add, per door:

If Insert Frame Type	$2.00
For other designs	.50

Rule 4 — Wide Stiles and Rails

For Stiles and Rails wider than Standard Layout, add per door:

WIDTH	Uns. Birch, Uns. Gum, R. Gum, R. Oak, Wh. Oak, Br. Ash Cal. Ash, Yel. Pine	Red or Wh. Birch, Chestnut, Cypress, Phil. Hdwd., Qtr. Oak, Qtr. Fig. Red Gum	African Mhgy., Am. Wal. Mexican Mhgy.

Stiles & Top Rail Over 5½″ to 6″	.40	.60	.70
Stiles & Top Rail Over 6″ to 6½″	.60	.90	1.00
Bottom Rail—Over 9¾″ to 12″	.20	.30	.40
Bottom Rail—Over 12″ to 14″	.30	.50	.60
Bottom Rail—Over 14″ to 16″	.40	.70	.80
Bottom Rail—Over 16″ to 18½″	.50	.90	1.00
Bottom Rail—Over 18½″ Add for each add. 2″	.10	.20	.30

Note: For Stiles and Rails narrower than 4⅞″—No Deduction.

For Side Lights with wider bottom rails than standard use 60% of foregoing extras.

Rule 5 Special Solid Sticking

For Square sticking (requiring full width veneers), add per door:

American Walnut, African or Mexican Mahogany	$ 0.40
All other Native Woods	.20

For other designs, all Woods, if other than C & B, B & C, Bead, Ovolo, QR, PG, or OG:

If not over ½" wide, of practical machining design, add per door	.20
Minimum on any one order	5.00
Maximum on any one order	10.00
For new Special Knives, add for knives, in addition to foregoing, minimum	20.00

For any design, if Sticking is over ½" up to and including ¾" wide, add to the foregoing, per door:

American Walnut, African or Mexican Mahogany	.30
All other Native Woods	.20
For different Sticking at glass than at panel, add per door	2.00

Rule 6 Mirror Doors

For preparing for Sunken Mirror, in addition to regular design extra, add per door:
